Press Release
Maisomage for Matter & HomeKit
Version 5.0 (available soon)

Download on the App Store

Maisomage Launches Version 5 (Currently final Beta)
Maisomage simplifies the management of smart homes, even with numerous devices.

HomeKit scenes allow users to set favorite configurations for one or multiple connected devices with a single action: launching the scene.
Version 5 makes launching scenes much easier and offers multiple ways for users to do so.

Key Points of this version 5.0

★ Icons
- New orange-background icons representing each scene's actions.

- Light colors visible within their icons.
- Icons for shutters, curtains indicating if open / closed / partially open.

★ Shortcuts
- Automatic shortcuts available for each scene.
- Quick access via Spotlight search on iPhone, iPad, Vision Pro, and in version 26 on Mac.
- Swiping the iOS home screen reveals search, with direct access to your scenes without opening the app.
- **AI suggests your usual scenes for the moment—hands-free access!**

One swipe, one click, your lights are on, and your curtains are closed. Home automation has never been this accessible.

- Icon representing the main action. A consistent, familiar interface from Spotlight search screens.
- Place your shortcuts on your iPhone/iPad home screen.

★ Automate with the Shortcuts App
- Maisomage actions are available in Apple Shortcuts.
- Automations are integrated with your device rather than with the HomeKit hub.

Trigger a scene when you stop an alarm on your iPhone, for example, your curtains open, and your coffee starts brewing.

★ And always the Maisomage interface
- Easily find your scene.
- Launch it effortlessly.
- Rename your scenes as needed.
- Visualize all your sensors: temperature, humidity, air quality, etc.
- Accessibility with Large Text and VoiceOver full compatibility.
- Automations to manage CO2 and save energy.

★ Attractive Pricing
- The app is available for $2.99/€2.99.
- Unlimited shortcut use for 2 days every 7 days.
- In between, 2 shortcuts remain usable per day.
- Beyond that, a subscription grants unlimited shortcut access plus automations for energy savings.
- Special Price for the First 17,000 Early Adopters: Only $7.99/€7.99 per year.

Platform Availability:
Maisomage is available on iPhone, iPad, Mac, Apple Vision Pro, and Apple TV.
